

# Glass Ribbon Collection

The pink fused glass, made by those touched by breast cancer and those who care, is fired at the Gary Rosenthal Studio and turned into these special products.

We donate 10% of the sales of these products to breast cancer research and awareness.

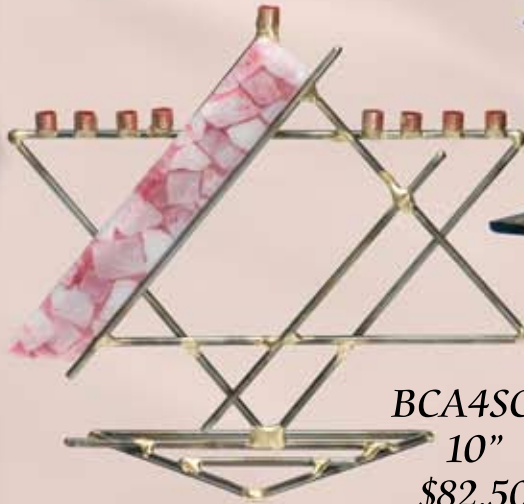

As participants in our free Glass Ribbon project, you are making this special glass. As a thank you, we offer you the opportunity to purchase any of the items you make during the activity at a 25% discount from the retail price. All the available items, as well as their discounted prices are listed on this flyer.
